EDUCATION

Indiana University, Luddy School of Informatics, Computing and Engineering | Bloomington, IN

May 2029

Bachelor of Science in Computer Science

GPA: 3.96/4.00

Major: Computer Science | **Minors:** Accounting, Data Science, Math

TECHNICAL SKILLS

Python | Linux | VS Code | Java

WORK EXPERIENCE

Math and Computer Science Tutor | Bloomington, Indiana

December 2025 - Present

Tutor

- Provided individualized tutoring in calculus, strengthening conceptual understanding and improving students' problem-solving skills
- Supported students in understanding core computer science concepts, assisting with debugging, logic, and building computational thinking

SEO First Year Academy | Bloomington, Indiana

December 2025 - Present

Software Engineer Scholar

- Selected as 1/75 for an intensive technical fellowship focused on industry-standard software engineering practices and career readiness.

LEADERSHIP & INVOLVEMENT

ColorStack IU | Bloomington, Indiana

August 2025 - Present

Freshman Representative

- Advocate for underclassmen by voicing their perspectives and contributing to initiatives that empower students of color in technology fields
- Contribute to the development of events and programs by providing input and assistance

Technology Management Club | Bloomington, Indiana

September 2025 - Present

Executive Board, Generative AI Team

- Plan and speak at events on generative AI, highlighting new technologies, real-world uses and career opportunities in technology fields
- Coordinate speaker and panel talks, participating in discussions that engage students on the impact of AI and other innovations

Wonderlab Museum | Bloomington, Indiana

September 2025 - Present

Volunteer

- Assist with hands-on exhibits and science demonstrations, encouraging children to explore science concepts in an engaging way
- Support staff with preparing event materials, setting up exhibits, and engaging with attendees during programs to ensure a welcoming space

Municipal Gardens | Indianapolis, Indiana

August 2024 - December 2024

Community Volunteer

- Partnered with staff to organize youth programs, including basketball and other sports, fostering teamwork and discipline
- Mentored youth participants by providing encouragement and guidance, building confidence and strengthening community relationships

PROJECTS

Research on LiCoO₂ Cathode Material | Bloomington, Indiana

June 2025 - August 2025

Undergraduate Research Assistant

- Conducted Density Functional Theory (DFT) simulations using Quantum ESPRESSO to investigate the electronic structure of LiCoO₂, deepening insight into cathode stability, charge transfer, and overall electrochemical behavior.
- Applied computational chemistry methods and pseudopotential libraries to model atomic interactions, refining accuracy of simulations while gaining hands-on experience in high-performance computing and materials modeling.
- Collaborated with lab mentors to interpret results and prepare data for inclusion in ongoing research on lithium-ion battery materials.

Case Competition - Technology Management Club | Bloomington, Indiana

November 2025 - November 2025

Participant

- Analyzed a real-world business scenario and developed a data-driven solution to with a team of 4 students
- Delivered a structured recommendation deck focused on increasing market capitalization and presented findings to a panel of four judges.

Computer Science Projects | Indianapolis, Indiana

August 2022 - May 2025

Student Presenter

- Developed and showcased original games and applications through poster symposiums at high school technology events.
- Presented technical concepts to peers, teachers, and community members, strengthening communication and teamwork skills.
- Demonstrated creativity and problem-solving by building interactive projects with an emphasis on design, coding, and usability
